20 Major BJP-led Union Government Policies and Schemes

A neutral educational sample document for testing a Retrieval-Augmented Generation (RAG) PDF assistant. Policies are summarized for learning and retrieval experiments, not political advocacy.

1. Pradhan Mantri Jan Dhan Yojana (PMJDY)

Launched in 2014, PMJDY is a national financial-inclusion programme aimed at expanding access to basic banking services. It promotes bank accounts for previously unbanked households and links eligible users with facilities such as debit cards, direct benefit transfers, insurance-related benefits and other formal financial services. In public-policy terms, the programme is intended to reduce dependence on cash-only and informal financial arrangements while creating an account-based channel through which government benefits can be transferred.

RAG keywords: pradhan, mantri, jan, dhan, yojana

2. Swachh Bharat Mission

Launched in 2014, the Swachh Bharat Mission focuses on sanitation, cleanliness and improved waste-management practices. Its rural and urban components have included construction and use of toilets, campaigns against open defecation, behavioural-change communication and measures related to solid and liquid waste management. The programme combines infrastructure spending with public-awareness efforts, making it useful for studying how a large government mission can mix physical targets with social and behavioural objectives.

RAG keywords: swachh, bharat, mission

3. Make in India

Make in India was introduced in 2014 to encourage manufacturing, investment and industrial development in India. The initiative seeks to improve the environment for domestic and foreign investment, strengthen selected manufacturing sectors and increase India's role in global production networks. It has been associated with reforms and promotional efforts covering areas such as investment facilitation, infrastructure, industrial policy and ease of doing business.

RAG keywords: make, in, india

4. Digital India

Digital India, launched in 2015, is an umbrella programme for expanding digital infrastructure, public digital services and digital participation. Major themes include broadband and connectivity, electronic delivery of government services, digital identity and payments, digital literacy and access to information. The initiative illustrates the use of technology platforms to deliver public services at scale and to connect citizens, businesses and government agencies.

RAG keywords: digital, india

5. Pradhan Mantri Awas Yojana (PMAY)

PMAY is a housing-focused programme with urban and rural components intended to improve access to adequate housing. Depending on the component and beneficiary category, support can involve assistance for house construction, housing-related subsidies or other forms of public support. The programme is especially relevant for understanding how housing policy intersects with poverty reduction, infrastructure, land, finance and urbanisation.

RAG keywords: pradhan, mantri, awas, yojana, pmay

6. Skill India Mission

Skill India is a broad policy effort aimed at improving vocational skills, employability and workforce readiness. Programmes under the skills ecosystem support training, certification, recognition of prior learning and industry-oriented skill development. The policy responds to the challenge of connecting a large working-age population with labour-market requirements and improving the quality and relevance of occupational training.

RAG keywords: skill, india, mission

7. Startup India

Startup India was launched in 2016 to support entrepreneurship and the startup ecosystem. The initiative includes measures intended to simplify compliance, improve access to support and funding mechanisms, encourage innovation and strengthen networks among startups, incubators and other institutions. It is often examined as part of India's wider policy shift toward innovation-led business creation and technology entrepreneurship.

RAG keywords: startup, india

8. Pradhan Mantri Ujjwala Yojana (PMUY)

PMUY was launched in 2016 to expand access to LPG cooking connections among eligible households, particularly women from economically disadvantaged families. Its policy rationale includes reducing reliance on traditional solid cooking fuels and the household air pollution associated with them. The programme also illustrates the intersection of energy access, public health, gender, household expenditure and subsidy policy.

RAG keywords: pradhan, mantri, ujjwala, yojana, pmuy

9. Goods and Services Tax (GST)

The Goods and Services Tax was implemented in 2017 as a major reform of India's indirect-tax system. It brought numerous central and state indirect taxes into a common framework with multiple tax rates and a technology-based compliance system. GST is intended to create a more integrated national market, reduce cascading taxation and improve tax administration, although implementation and rate design have continued to evolve.

RAG keywords: goods, and, services, tax, gst

10. Saubhagya Scheme

The Pradhan Mantri Sahaj Bijli Har Ghar Yojana, commonly known as Saubhagya, was launched in 2017 with the goal of expanding household electricity connections. It focused on connecting households that remained unelectrified and complemented broader power-sector efforts involving generation, transmission and distribution. For energy-policy analysis, it provides an example of the difference between village electrification, household connections and the wider questions of reliability and affordability.

RAG keywords: saubhagya, scheme

11. Ayushman Bharat

Ayushman Bharat was launched in 2018 as a major health-sector initiative. It includes a health-insurance or assurance component for eligible families and a primary-care component associated with Health and Wellness Centres, now commonly linked with Ayushman Arogya Mandirs. The policy seeks to reduce financial hardship from hospitalisation while strengthening access to health services, making it relevant to discussions of universal health coverage.

RAG keywords: ayushman, bharat

12. PM-KISAN

Pradhan Mantri Kisan Samman Nidhi, or PM-KISAN, provides income support to eligible farmer families through direct transfers. Introduced in 2019, the scheme uses digital beneficiary identification and banking channels to deliver periodic payments. It is an example of a direct-income-support approach to agricultural welfare rather than support delivered only through input subsidies or administered agricultural prices.

RAG keywords: pm-kisan

13. Jal Jeevan Mission

Jal Jeevan Mission was launched in 2019 with a focus on providing functional household tap-water connections in rural India. Beyond construction of water infrastructure, the mission includes themes such as source sustainability, water quality, local participation and operation and maintenance. It is useful for analysing the institutional and engineering challenges involved in delivering a basic public utility across diverse rural regions.

RAG keywords: jal, jeevan, mission

14. National Education Policy 2020

The National Education Policy 2020 sets out a broad reform framework covering school education, higher education, vocational learning, multidisciplinary education, teacher development and institutional restructuring. Among its prominent themes are foundational literacy and numeracy, flexibility in learning pathways and changes to the structure of school education. Implementation depends on actions by the Union government, states, educational institutions and regulatory bodies.

RAG keywords: national, education, policy, 2020

15. Atmanirbhar Bharat

Atmanirbhar Bharat, or Self-Reliant India, became a prominent policy framework in 2020. It combines economic measures and sectoral policies intended to strengthen domestic productive capacity, resilience, infrastructure and competitiveness. The framework has included support measures for businesses and households as well as policies aimed at encouraging domestic manufacturing and reducing vulnerabilities in selected supply chains.

RAG keywords: atmanirbhar, bharat

16. Production Linked Incentive (PLI) Schemes

PLI schemes provide performance-linked incentives for eligible manufacturers in selected sectors. They are designed to encourage incremental production, investment, scale and development of manufacturing capacity in India. Different sectors have separate scheme rules and eligibility conditions. From an industrial-policy perspective, PLI is notable because incentives are tied to specified performance criteria rather than being a single general manufacturing subsidy.

RAG keywords: production, linked, incentive, pli, schemes

17. PM Gati Shakti

PM Gati Shakti is a national master-planning approach launched in 2021 to improve coordination of infrastructure development. It uses a digital platform and geospatial information to support planning across sectors such as roads, railways, ports and logistics. The underlying policy problem is that infrastructure projects managed by different agencies can suffer from fragmented planning, delays and poor coordination.

RAG keywords: pm, gati, shakti

18. National Green Hydrogen Mission

The National Green Hydrogen Mission aims to develop India's green-hydrogen ecosystem, including production, demand creation, technology development, infrastructure and supporting industrial capabilities. Green hydrogen is produced using low-carbon electricity pathways, particularly renewable-energy-based electrolysis. The mission connects India's energy-transition goals with industrial development, energy security, technology and potential future export opportunities.

RAG keywords: national, green, hydrogen, mission

19. PM Vishwakarma

PM Vishwakarma was launched in 2023 to support artisans and craftspeople working in specified traditional trades. The programme includes elements such as recognition, skill upgrading, tool-related support, credit access, digital transaction incentives and marketing assistance. It represents an attempt to combine traditional livelihoods with formal finance, modern skills, productivity improvements and market access.

RAG keywords: pm, vishwakarma

20. PM Surya Ghar: Muft Bijli Yojana

PM Surya Ghar: Muft Bijli Yojana was launched in 2024 to promote residential rooftop solar systems. The programme uses financial support and an implementation framework intended to expand household adoption of rooftop photovoltaic generation. It links household electricity costs with distributed renewable energy and is relevant to questions involving grid integration, net metering, distribution companies, solar financing and India's broader clean-energy transition.

RAG keywords: pm, surya, ghar, muft, bijli
